Allocate staff leave via integrated project timesheets.

Time Sheet & Tracking

Track staff movement and projects with time sheets and avoid missing any billable hours.

Why SMART ADMIN?

Technology is always changing.

Traditional office management applications have little inbuilt flexibility- having multiple software tools, that require large purchasing, maintenance and upgrade costs, in time and money.

SMART ADMIN is a competitively priced, flexible, highly customizable, cloud-based subscription solution, integrated into a single platform, and scalable to any size requirements.

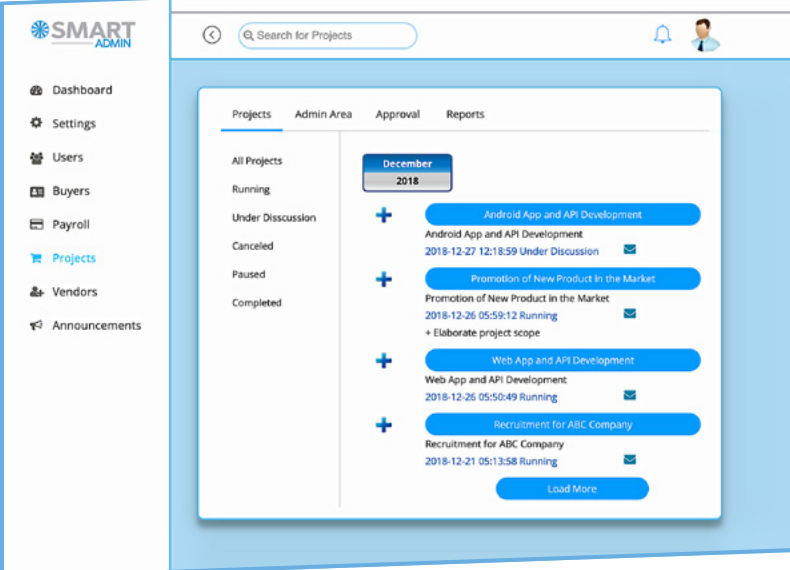

This software can accommodate changes with quick and easy implementation, as it can be configured for use across multiple countries and time-zones, by using any combination of currencies.

Its customizable salary, leave and holiday packages make SMART ADMIN ideal for any organization, culture, and country. In addition, server data protection is secured with SHA encryption, with access restricted to users only. All maintenance is implemented by our dedicated support team.

Adjustable tax settings can incorporate variable tax components such as VAT, GST, Sales Tax and Service Tax.
